

## Java

```
class Solution {  
    public String makeAntiPalindrome(String s) {  
  
    }  
}
```

---

## JavaScript

```
/**  
 * @param {string} s  
 * @return {string}  
 */  
var makeAntiPalindrome = function(s) {  
  
};
```

---

## TypeScript

```
function makeAntiPalindrome(s: string): string {  
  
};
```

---

## C++

```
class Solution {  
public:
```

```
    string makeAntiPalindrome(string s) {  
    }  
};  
-----
```

## C#

```
public class Solution {  
    public string MakeAntiPalindrome(string s) {  
    }  
}
```

## Kotlin

```
class Solution {  
    fun makeAntiPalindrome(s: String): String {  
    }  
}
```

## Go

```
func makeAntiPalindrome(s string) string {  
  
}
```
